

Global Education Project – YAGNA Gurukul

Mission: This is a collaborative global internship project benefitting the children of YAGNA Gurukul, India with a mission to provide educational resources to underserved Children.

Goals: To empower a global community of high school and college–level students by delivering advanced, engaging STEAM education, while providing the intern with meaningful international teaching and curriculum development experience.

Objective: The intern will design, and deliver advanced-level STEM/STEAM curriculum (e.g., Scratch, CapCut, Canva, Python) tailored to the academic needs of global learners at the high school and college level, and actively teach this content to YAGNA Gurukul students to foster engagement, skill development, and global collaboration.

Deliverables:

- Mandatory in-person final project presentation to summarize the outcomes of the project and challenges faced, proposed solutions
- Final report listed as above

Requirements:

- Interns are expected to be available online/Teams meeting for teaching sessions to accommodate international students in India time zone
- Exact days & timings will be communicated during the internship orientation
- Mentor Supervision with subject matter expertise.
